OPERATING MANUAL

Bluetooth Enabled Hands-Free Kit / Headset

OVERVIEW

This unit uses Bluetooth technology that allows wireless communications on devices such as cellular phones. This is designed to be a totally wireless hands-free car kit or a stand-alone wireless headset. This provides the user to operate a cellular phone inside the car while driving and can also be used anywhere by detaching the earpiece and becomes a stand-alone Bluetooth headset. The unit will work on all Bluetooth cellular phones provided that they respect the Bluetooth protocol.

A. ILLUSTRATIONS

1 – Magnet
2 – Charging Pins
3 – Charge/Power Indicator
4 – Line Pick-up Button
5 – Cigarette Lighter Plug
6 – Main Speaker
7 – Ear Hook
8 – Multi-function Button (Talk/Power/Volume)
9 – Microphone / Indicator lights
10 – Speaker Volume
11 – Earphone

B. TURNING ON/OFF THE UNIT

There are two ways to turn ON/OFF the unit depending on how it is being used. When used as a hands-free car kit, plugging it in the cigarette lighter plug (5) activates the unit. When used as headset, follow the steps below:

1. Press the multi-function button for 2 seconds. A low-high tone will then be heard and a blue light will show.
2. Release the button and the indicator light will blink. The headset is now ready and is waiting for a call (standby mode). (Note: If the indicator becomes red, it means that the battery on the headset is low. Re-charge it immediately by putting it back to the main unit.)
3. Turn the headset OFF by pressing the multi-function button for more than 4 seconds or more depending on the phone. A high-low tone will then be heard and the indicator light becomes red then turns off after a few seconds.
4. Wait at least 4 seconds before turning the headset ON again.

REMARK:

When the cell phone is not detected for more than 5 minutes, if used as a stand-alone headset or docked and no power from the Cigarette lighter plug, it will turn off automatically to conserve battery life.

C. OPERATIONS

Before use, the headset must be paired with the phone. Pairing is done only once. After being paired, the phone and the headset will be automatically connected anytime when the phone is used. (Please see Headset Operations for Popular Cell Phones section on page 4 for instructions.)

D. INSTALLING THE MICROPHONE

1. Put two (2) "AAA" Alkaline batteries in the wireless microphone. The negative polarity of the batteries must be in the spring side.
   Note: Microphone battery life is more than 500 calls (if 3 calls/day, battery life = more than 5 months).
2. It is highly recommended that you attach your microphone to the sun visor. Please make sure that it does not hide the microphone otherwise your voice will be attenuated.
3. Turn "ON" the microphone by using the power switch.

REMARKS:

- If microphone is not "ON" during the communication, the sound on the speaker will be attenuated.
- In standby mode, the microphone will still have a small consumption (less the 1.8 microwatts).
- On some versions the indicator light will only turn ON for 2 seconds after the microphone is switched ON. If the light is red, this indicates low battery.
- The microphone is activated by the Hands-Free Kit base and can remain in "ON" position even if not used, but in order to extend your battery life, it is recommended to switch "OFF" your microphone when not using for a long time.

E. FUNCTION CONTROLS

Adjust the Function Controls as recommended:

1. **Tone Control**
   "H" for High Tone
   "L" for Low Tone.
2. **ASP Control**
   ON = Echo and Feedback Canceller
   OFF = Echo Reducer only
3. **Adjustable Microphone Gain (MIC) Control**
   "H" for high gain; "L" for low gain.
   "L" is necessary in noisy background.

Control Switches

The Microphone gain must be adjusted to match with your cell phone model. If the gain is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

Recommended Function Controls Setting (Working on all models):		
MIC	=	L
ASP	=	ON
TONE	=	H

Note :
On high background environment, If you experience audio level fluctuation, turn ASP " **OFF** ".

F. SETTING THE VOLUME

There are two volume controls on the unit. One is on the main unit which is the speaker volume (10) and controls only the main speaker (6). The other is on the headset which is the multi-function button (8) and sets both the earphone (11) and the main speaker (6).

The headset volume control is digital and is combined with the multi-function button (8). Pressing it clockwise increases the volume.   Counter-clockwise decreases it.   Continuous pressing of the digital volume control can also rapidly set the volume. (Please refer to the Headset Operations for Popular Cell Phones section on page 4 for additional information.)

During a communication, pick-up the earphone and adjust it's volume (8). Replace the earphone on the base and adjust the speaker volume (10).
If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

G. ANSWERING/ RECEIVING A CALL

When the phone is receiving a call, the phone ring tone will be heard on the hands-free kit or on the headset. Just press button (4) on the main unit, or button (8) on the headset once to answer the call.   Pressing the button again will hang-up and terminates the call. (Please refer to the Headset Operations for Popular Cell Phones section on page 4 for additional information.)

H. MAKING A CALL

Calling through the hands-free kit can be done using voice tags (refer to the Headset Operations for Popular Cell Phones section on page 4 for saving and activating voice tags). The steps are:
1. Press the line pick-up button (4) once on the main unit or the multi-function button (8) to activate the voice dialing.
2. A beep will then be heard prompting the user to say the name of the person to call.
3. Say the name. The name will be played back to you.
4. The phone will then place the call automatically. In case the phone does not recognize the name spoken, the steps above may be repeated.
5. Press the button again to terminate the call.

If the desired number to be dialed has no voice tag, normal dialing can also be done using the keypad on the phone. (Please refer to the Headset Operations for Popular Cell Phones section on page 4 for additional information.)

Important Remark:
On some versions of Nokia's software, the headset/car kit will not connect automatically to the cell phone. You will need to press the multi-function button once to connect it to the cell phone.

HEADSET OPERATIONS FOR POPULAR CELL PHONES

Note 1: If your phone is not included on the following list of this manual, kindly refer to the manual of your phone.

Note 2: Softwares and menus could be modified by the cell phone's manufacturers without prior notice. If the manual does not match with your cell phone operations, kindly refer to the manual of your cell phone.

Suggested Pairing Modes

Cell Phone Models	Pairing Mode	
	Headset	Handsfree
Ericsson T68	✔	
Ericsson T68i (R6 and below)	✔	
Ericsson T68i (R7)		✔
Ericsson T39m	✔	
Ericsson P800	✔	
Ericsson T610		✔
Nokia 6310/6310i		✔
Nokia 8910		✔
Nokia 8910i		✔
Nokia 3650		✔
Siemens S55		✔

USING WITH SONY ERICSSON T68/T68i

a. **ACTIVATING THE BLUETOOTH**

You must activate your Bluetooth to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.

1. Go the Menu Key by pressing the joystick. Scroll to *Connect*, **YES**. Select *Bluetooth*, **YES**. Select *Options,* **YES**. *Operation mode,* **YES**. *On,* **YES**.
2. Continue pressing **NO**, to exit.

QUICK ACCESS:

Press *Menu* followed by the sequence of numbers below.

	Connect	Bluetooth	Options	Operation mode
T68	8	3	-	2
T68i	8	4 (or 3 for T68i R7)	4	1

b. **PAIRING TO THE CELLULAR PHONE**

1. Bring the cellular phone at about 20 cm from the headset.
2. Detach the headset from the holster/base.
3. Turn off the headset.
4. From the OFF state, press the multi-function button for 10 seconds or until a distinctive three-tone sound will be heard and at the same time the red and blue indicator will alternately blink. This indicates that the unit is now ready for pairing. For T68 and T68i older versions, R6 and below, press the multi-function button again (headset mode).
5. Go the Menu Key by pressing the joystick. Scroll to *Connect*, **YES**. Select *Bluetooth*, **YES**.
6. Select *Paired devices*, **YES**. *Add device*, **YES**. Choose *Phone initiates*, **YES**. Choose *Headset/Handsfree,* **YES**. The phone will then search the device to be added. After the device is found, press **YES**.

QUICK ACCESS (for steps 5 and 6):

Press *Menu* then follow the sequence of numbers below:

	Connect	Bluetooth	Paired devices	Add device	Phone initiates	Headset/ Handsfree
T68	8	3	2	Yes	1	2
T68i	8	4 (or 3 for T68i R7)	2	Yes	1	2

7. Enter "0000" as the passkey. If the pairing is successful, the alternating red/blue lights will stop. Press **YES** to confirm the name of the device. If the pairing is unsuccessful, the steps above may be repeated.
8. Continue pressing **NO** to exit the menu key.

The unit is now ready to link calls from the phone directly to the headset. An icon, will appear during the standby mode indicating that the headset is linked with the phone.

c. **ANSWERING/RECEIVING A CALL**

When the phone is receiving a call, a ring tone will be heard on the headset.

1. Just press the multi-function button down once to answer the call. Pressing the button again will hang-up and terminate the call.
2. If you wish to answer a call on the cellular phone, just press **YES** and the call is automatically transferred to the phone. Pressing the multi-function button transfers the call on the headset.

To terminate the call, press the multi-function button again.

d. **MAKING A CALL with the headset on**

* **Normal dialing**
    1. Enter the contact number and press **YES**. Audio can be heard on the headset at the same time, a question will be displayed. *Retrieve call in phone?,* ignoring or pressing *No,* transfers the call to the headset. Pressing *Yes,* transfers the call to the cell phone.
    2. Press the multi-function button to hang-up and terminate the call.

* **Voice dialing**

    Refer to step f and g for the procedure when activating and recording for voice dialing.
    1. Press the multi-function button once to activate the voice dialing.
    2. A beep will then be heard on the headset prompting the user to say the name of the person to call.
    3. Say the name. The name will be played back to you. The phone will then place the call automatically. In case cell phone does not recognize the name spoken, the steps above may be repeated.
    4. Press the button again to terminate the call.

◆ **Redialing**
For T68i R6 and R7, press the multi-function button twice. Call is automatically transferred on the headset.

e.   REJECTING A CALL
For T68i R6 and R7, press the multi-function button twice to reject the incoming call.

f.   SETTING THE VOLUME
The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls only.
1.   Press it clockwise to increase the volume.
2.   Decreases the volume by pressing it counter-clockwise.
Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

Note: Volume keys of the cellular phone can also be used to set the volume.

g.   ACTIVATING THE VOICE DIALING
Use your phone when recording for the voice dialing. Before voice dialing, you must first turn on the name dialing function and record your voice. To turn voice dialing on and record number types:
◆ **Using T68 Sony Ericsson**
1.   Go to the Menu Key by pressing the joystick. Scroll to *Settings,* **YES**. *Voice control,* **YES**.
2.   *Voice settings,* **YES**. *Voice dialing,* **YES**. Select *On,* **YES**.
3.   Continue pressing **NO** to exit
◆ **Using T68i Sony Ericsson**
1.   Go to the Menu Key by pressing the joystick. Scroll to *Settings,* **YES**. *Voice control,* **YES**. *Voice dialing,* **YES**.
2.   Select *On,* **YES**.
3.   Continue pressing **NO** to exit
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below.

	Settings	Voice control	Voice settings	Voice dialing	On
T68	5	8	1	1	1
T68i	5	6	-	1	1

h.   RECORDING FOR VOICE DIALING
◆ **Using T68 Sony Ericsson**
1.   Go to the *Menu Key* by pressing the joystick. Scroll to *Settings* and press **YES**. Choose *Voice control,* **YES**. *Voice Commands,* **YES**. Select a contact, **YES.** *Add voice,* **YES**.
2.   Follow the instructions in the display. An icon will appear next to a contact name which has a voice command.
3.   Continue pressing **NO** to exit.
◆ **Using T68i Sony Ericsson**
1.   Go to the *Menu Key* by pressing the joystick. Scroll to *Settings* and press **YES**. Choose *Voice control,* **YES** then go to *Voice dialing,* **YES**. *Edit name,* **YES**. *Add voice,* **YES**.
2.   Select a contact, **YES.**
3.   Follow the instructions in the display. An icon will appear next to a contact name which has a voice command.
4.   Continue pressing **NO** to exit.
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below.

	Settings	Voice control	Voice commands	Contacts
T68	5	8	2	4
	Settings	Voice control	Voice dialing	Edit names
T68i	5	6	1	2

Note: Record your voice command in a quiet place so that only your voice will be recorded on the phone.

USING WITH SONY ERICSSON T39m

a. **ACTIVATING THE BLUETOOTH**
You must activate your Bluetooth to establish a Bluetooth connection between
your mobile phone and other Bluetooth devices.
1. Press the *Menu Key*. Scroll to *Extras* and press **YES**. Select *Operation mode,* **YES**. *On,* **YES**.
2. Continue pressing **NO**, to exit.
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below.

	Extras	**Bluetooth**	**Operation mode**
T39m	5	6	4

b. **PAIRING TO THE CELLULAR PHONE**
1. Bring the cellular phone at about 20 cm from the headset.
2. Detach the headset from the holster/base.
3. Turn off the headset.
4. From the OFF state, press the multi-function button for 10 seconds or until a distinctive three-tone sound will be heard and at the same time the red and blue indicator will alternately blink. Press the multi-function button once (headset mode). This indicates that the unit is now ready for pairing.
5. Press the *Menu Key*. Scroll to *Extras*, **YES**. Select *Bluetooth*, **YES**. Select *Paired devices*, **YES**. *Add device*, **YES**. Choose *Phone initiates*, **YES**. Choose *Headset,* **YES**. The phone will then search the device to be added. After the device is found, press **YES**.
QUICK ACCESS (for steps 5 and 6):
Press *Menu* then follow the sequence of numbers below:

	Extras	**Bluetooth**	**Paired devices**	**Add device**	**Phone initiates**	**Headset**
T39m	5	6	2	Yes	1	2

6. Enter "0000" as the passkey. If the pairing is successful, the alternating red/blue lights will stop. Press **YES** to confirm the name of the device. If the pairing is unsuccessful, the steps above may be repeated.
7. Continue pressing **NO** to exit the menu key.

The unit is now ready to link calls from the phone directly to the headset.

c. **ANSWERING/RECEIVING A CALL**
When the phone is receiving a call, a ring tone will be heard on the headset.
1. Just press the multi-function button down once to answer the call. Pressing the button again will hang-up and terminate the call.
2. If you wish to answer a call on the cellular phone, just press **YES** and the call is automatically transferred to the phone. Pressing the multi-function button transfers the call on the headset.
3. To terminate the call, press the multi-function button again.

d. **MAKING A CALL with the headset on**
▸ **Normal dialing**
1. Enter the contact number and press **YES**. Audio can be heard on the headset at the same time, a question will be displayed. *Retrieve call in phone?,* ignoring or pressing *No,* transfers the call to the headset. Pressing *Yes,* transfers the call to the cell phone.
2. Press the multi-function button to hang-up and terminate the call.
▸ **Voice dialing**
Refer to step f and g for the procedure when activating and recording for voice dialing.
1. Press the multi-function button once to activate the voice dialing.
2. A beep will then be heard on the headset prompting the user to say the name of the person to call.
3. Say the name. The name will be played back to you. The phone will then place the call automatically. In case the cell phone does not recognize the name spoken, the steps above may be repeated.
4. Press the button again to terminate the call.

e. **SETTING THE VOLUME**
The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls only.
1. Press it clockwise to increase the volume.
2. Decreases the volume by pressing it counter-clockwise.

Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

f.   **ACTIVATING THE VOICE DIALING**
Use your phone when recording for the voice dialing. Before voice dialing, you must   first turn on the name dialing function and record your voice. To turn voice dialing on and record number types:
1.   Press the *Menu Key*. Scroll to *Settings,* **YES**. *Voice control,* **YES**.
2.   *Voice settings,* **YES**. *Voice dialing,* **YES**. Select *On,* **YES**.
3.   Continue pressing **NO** to exit
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below.

	Settings	Voice control	Voice settings	Voice dialing	On
T39m	4	9	1	1	1

g.   **RECORDING FOR VOICE DIALING**
1.   Press the *Menu Key*. Scroll to *Settings,* **YES**. *Voice control,* **YES**. *Voice Commands,* **YES**. Select *Contacts*, **YES**. *Add voice,* **YES**.
2.   Find a contact name and follow the instructions in the display. An icon will appear next to a contact name which has a voice command.
3.   Continue pressing **NO** to exit.
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below.

	Settings	Voice control	Voice commands	Contacts
T39m	4	9	2	4

Note: Noisy environment may affect voice recognition. Record your voice in a quiet environment.

USING WITH SONY ERICSSON P800

a.   **ACTIVATING THE BLUETOOTH**
You must activate your Bluetooth to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.
1.   On the Applications window (flip open mode), scroll and tap *Contol Panel* using the stylus. Go to *Connections*. Tap *Bluetooth.* Go to **Settings**. On the *Operation mode,* tap *On.*
2.   Tap 🔳 to exit and return to the Applications window.

b.   **PAIRING TO THE CELLULAR PHONE**
1.   Bring the cellular phone at about 20 cm from the headset.
2.   Detach the headset from the holster/base.
3.   Turn off the headset.
4.   From the OFF state, press the multi-function button for 10 seconds or until a distinctive three-tone sound will be heard and at the same time the red and blue indicator will alternately blink. Press the multi-function button once (headset mode). This indicates that the unit is now ready for pairing.
5.   On the Applications window (flip open mode), scroll and tap *Control Panel.*. Go to *Connections*. Tap *Bluetooth.* Bluetooth devices is displayed as sub-title. Tap **Add**. The phone is now searching for pairable devices.
6.   Tap the device you want to pair with. *Bonding in progress* will be displayed on screen. The phone will then ask for the pass key.
7.   Tap 🔳 on the lower left corner of the screen. Enter "0000" as the passkey and tap **Done**. Tap **Done** under the sub-title, "Secure Connection." If the pairing is successful, the alternating red/blue lights will stop.
8.   Tap 🔳 to exit and return to the Applications mode. If the pairing is unsuccessful, the steps above may be repeated.

The unit is now ready to link calls from the phone directly to the headset. An icon will appear during the standby mode indicating that the headset is linked with the phone.

c.   **ANSWERING/RECEIVING A CALL**
When the phone is receiving a call, a ring tone will be heard on the headset.
1.   Just press the multi-function button down once to answer the call. Pressing the button again will hang-up and terminate the call.
2.   If you wish to answer a call on the cellular phone, just press **YES** and the call is automatically transferred to the phone. Pressing the multi-function button transfers the call on the headset.
To terminate the call, press the multi-function button again.

d. **MAKING A CALL with the headset on**

- **Normal dialing**
  1. Enter the contact number and press **OK**. Sound is automatically transferred to the headset.
  2. Press the multi-function button to hang-up and terminate the call.

- **Voice dialing**
  Refer to step f and g for the procedure when activating and recording for voice dialing.
  1. Press the multi-function button once to activate the voice dialing. Sound is automatically transferred to the headset.
  2. A beep will then be heard on the headset prompting the user to say the name of the person to call.
  3. Say the name. The name will be played back to you. The phone will then place the call automatically. In case the cell phone does not recognize the name spoken, the steps above may be repeated.
  4. Press the button again to terminate the call.

e. **SETTING THE VOLUME**

The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls only.
1. Press it clockwise to increase the volume.
2. Decreases the volume by pressing it counter-clockwise.

Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.
f. **ACTIVATING THE VOICE DIALING**

Use your phone when recording for the voice dialing. Before voice dialing, you must first turn on the name dialing function and record your voice. To turn voice dialing on:
1. On the Applications window (flip open mode), tap *Phone.*
2. Tap *Edit* then tap *Preferences.* A list of features will appear.
3. Tap *Voice Control* then tap the box aligned to *Voice dialing* to check and activate the voice dialing feature. Tap the box aligned to *Play caller name* so that the name will be played back to you.
4. Tap **Done** on the on screen button when finished.
5. On the Preferences mode, tap **Done** again.
6. Tap 🎛 to exit and return to the Applications mode.

g. **RECORDING FOR VOICE DIALING**

The voice dialing feature is only applicable to contacts saved to phone memory.
1. On the Applications window (flip open mode), tap *Contacts.*
2. Tap the contact where you want to add a voice dialing feature. Tap **Edit**. Scroll to **Edit Contact**. Tap 🔘 on the on-screen buttons.
3. Tap **Record**. *Speak after tone* will be displayed on the screen.
4. Record your voice. To check if your recording is of good quality, tap **Play**. If not, tap **Record** again. Press **Done** when finished.
5. Tap 🔄 to make another record and repeat the steps above. To return to the Applications window, tap 🎛 button.

Note: Noisy environment may affect voice recognition. Record your voice in a quiet environment.

USING WITH SONY ERICSSON T610

a. **ACTIVATING THE BLUETOOTH**

You must activate your Bluetooth to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.
1. Go the Menu Key by pressing the joystick. Scroll to *Connectivity*, **SELECT**. Select *Bluetooth*, **SELECT**. *Turn On,* **SELECT**.
2. Continue pressing 🔄 to exit.

b. **PAIRING TO THE CELLULAR PHONE**
1. Bring the cellular phone at about 20 cm from the car kit.
2. Detach the headset from the holster/base.
3. Turn off the headset.
4. From the OFF state, press the multi-function button for 10 seconds or until a distinctive three-tone sound will be heard and at the same time the red and blue indicator will alternately blink. This indicates that the unit is now ready for pairing.

5. Go the Menu Key by pressing the joystick. Scroll to *Connectivity*, **SELECT**. Select *Bluetooth*, **SELECT**.
6. Scroll to *My devices*, **SELECT**. *New device*, **ADD**. The phone is now searching for pairable devices to be added. Select the device you want to pair with your cell phone. Press **SELECT**.
7. Enter "0000" as the passkey then press OK. If the pairing is successful, the alternating red/blue lights will stop.
8. Continue pressing ⬅ to exit the menu key.

The unit is now ready to link calls from the phone directly to the car kit. An icon, will appear during the standby mode indicating that the car kit is linked with the phone.

c.   ANSWERING/RECEIVING A CALL
When the phone is receiving a call, a ring tone will be heard on the car kit.
1. Just press the multi-function button down once to answer the call. Pressing the button again will hang-up and terminate the call.
2. If you wish to answer a call on the cellular phone, just press **YES** and the call is automatically transferred to the phone. Pressing the multi-function button transfers the call on the car kit.
3. To terminate the call, press the multi-function button again.

d.   MAKING A CALL with the headset on
   Normal dialing
   1. Enter the contact number and press **CALL** button. Audio is automatically transferred to the car kit.
   2. Press the multi-function button to hang-up and terminate the call.

   Voice dialing
   Refer to step e and f for the procedure when activating and recording for voice dialing.
   1. Press the multi-function button once to activate the voice dialing.
   2. A beep will then be heard on the car kit prompting the user to say the name of the person to call.
   3. Say the name. The name will be played back to you. The phone will then place the call automatically. In case the cell phone does not recognize the name spoken, the steps above may be repeated.
   4. Press the multi-function button again to terminate the call.

e.   REJECTING A CALL
Press the multi-function button twice to reject the incoming call.

f.   SETTING THE VOLUME
The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls only.
1. Press it clockwise to increase the volume.
2. Decreases the volume by pressing it counter-clockwise.
Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

g.   ACTIVATING THE VOICE DIALING
Use your phone when recording for the voice dialing. Before voice dialing, you must first turn on the name dialing function and record your voice. To turn voice dialing on and record number types:
1. Go to the Menu Key by pressing the joystick. Scroll to *Settings,* **SELECT**. *Voice control,* **SELECT**. *Voice dialing,* **SELECT**.
2. Choose *On,* **SELECT**.
3. Continue pressing ⬅ to exit.

h.   RECORDING FOR VOICE DIALING
1. Go to the *Menu Key* by pressing the joystick. Scroll to *Settings* and press **SELECT**. Choose *Voice control,* **SELECT** then go to *Voice dialing,* **SELECT**. *Edit name,* **SELECT**. *New voice,* **ADD**.
2. Find a contact then press **SELECT**.
3. Follow the instructions that is displayed. Voice is automatically saved on the phone. An icon will appear next to a contact name which has a voice command.
4. Continue pressing ⬅ to exit.

Note: Noisy environment may affect voice recognition. Record your voice in a quiet environment.

USING WITH NOKIA 6310/6310i

a. **ACTIVATING THE BLUETOOTH**

You must activate your Bluetooth to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.

1. Press the *Menu* button. Scroll to *Bluetooth,* **SELECT**. Press **SELECT** again.
2. Choose *On,* **SELECT**. An icon will appear on the upper left corner.
3. Press *Back* then *Exit* to exit the *Menu.*

QUICK ACCESS:

Press *Menu* followed by the sequence of numbers below.

	Bluetooth	Select	On	Select
6310	10	1	1	1
6310i	11	1	1	1

b. **PAIRING TO THE CELLULAR PHONE**

1. Bring the cellular phone at about 20 cm from the headset.
2. Detach the headset from the holster/base.
3. Turn off the headset.
4. From the OFF state, press the multi-function button for 10 seconds or until a distinctive three-tone sound will be heard and at the same time the red and blue indicator will alternately blink. This indicates that the headset is now ready for pairing.
5. Press the *Menu* button. Scroll to *Bluetooth,* **SELECT**. Scroll to *Search for audio accessories,* **SELECT**. The phone is now scanning for Bluetooth devices. **SELECT** the headset. The phone will initiate connection with the headset.

   QUICK ACCESS (for step 5):

   Press *Menu* followed by the sequence of numbers below.

	Bluetooth	Search for audio accessories
6310	10	2
6310i	11	2

6. Enter "0000" as the passcode then press **OK**. The phone is now connected with the headset.
7. Press *Back* then *Exit* to exit the *Menu.*

The headset is paired and ready to use. An icon will be displayed during the standby mode indicating that the headset is linked with the phone.

Note: Once paired, the headset and the phone have simultaneous connection with each other (keypad tones can be heard on the headset every time the keypad is pressed).

c. **AUTO ACCEPT MODE**

The auto accept mode allows the Bluetooth function to be turned on automatically whenever the user starts sending information such as answering or making a call via the Bluetooth headset.

1. Press the *Menu* button. Scroll to *Bluetooth,* **SELECT**. Scroll to *View paired devices,* **SELECT**.
2. Select the headset and press **OPTIONS**. Scroll to *Request conn. authorisation,* **SELECT**. *No,* **SELECT**.
3. Continue pressing *Back* button to exit the *Menu.*

QUICK ACCESS:

Press *Menu* followed by the sequence of numbers below.

	Bluetooth	View paired devices	Select
6310	10	4	Options
6310i	11	4	Options

d. **ANSWERING/RECEIVING A CALL**

When the phone is receiving a call, a ring tone will be heard on the headset as well as on the phone.

1. Press the multi-function button down once to answer the call.
2. End the call by pressing the button again.

Note: Cell phone buttons can also be used to answer a call but audio is still transferred to the headset.

e. **MAKING A CALL with the headset on**

- **Normal dialing**
  1. Enter the contact number and send. As you dial, audio and the keypad tones can be heard on the headset simultaneously but not on the phone.

2. Press the multi-function button to hang-up and terminate the call.
Note: If the call is terminated using the cellular phone, a tone will be heard on the headset indicating that the call has been terminated.

✦ **Voice dialing**
Refer to step g for the procedure when recording for voice dialing.
1. Press the multi-function button once to activate the voice dialing.
2. A beep will then be heard on the headset prompting the user to say the name of the person to call.
3. Say the name. The name will be played back to you. The phone will then place the call automatically. In case the cellular phone does not recognize the name spoken, the steps above may be repeated.
4. Press the button again to terminate the call.

✦ **Redialing**
Press quickly the multi-function button twice to redial the last number.

f. REJECTING A CALL
Press the multi-function button twice to reject the incoming call.

g. SETTING THE VOLUME
The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls or every time a key is pressed on your cell phone.
1. Press it clockwise to increase the volume.
2. Decrease the volume by pressing it counter-clockwise.
As you press the button, the volume level is simultaneously displayed on the cellular phone. Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls.

Note: It is also possible to use the volume keys of the cellular phone to set the volume.

h. RECORDING FOR VOICE DIALING
Use your phone when recording voice dialing.
1. Press the *Names* button. *Search,* **SELECT**. Press *List* button.
2. Find a contact name. Press *Details* button.
3. Press *Options* button. *Add voice tag,* **SELECT.** Instructions appear. Your voice is automatically saved on the phone after being played back to you.
4. In case you wish to change your recorded voice, press *Options* button. *Voice tags,* **SELECT**. *Change,* **SELECT**. Instructions appear.
5. Continue pressing *Back* button to exit.

Note: Record your voice command in a quiet place so that only your voice will be recorded on the phone.

USING WITH NOKIA 8910

a. ACTIVATING THE BLUETOOTH
You must activate your Bluetooth to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.
1. Press *Menu*. Scroll to *Bluetooth,* **SELECT**. Press **SELECT** again.
2. Choose *On,* **SELECT**. An icon will appear on the upper left corner.
3. Press *Back* then *Exit* to exit the *Menu*.
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below.

	Bluetooth	Select	On	Select
8910	10	1	1	1

b. PAIRING TO THE CELLULAR PHONE
1. Bring the cellular phone at about 20 cm from the headset.
2. Detach the headset from the holster/base.
3. Turn off the headset.
4. From the OFF state, press the multi-function button for 10 seconds or until a   distinctive three-tone sound will be heard and at the same time the red and blue indicator will alternately blink. This indicates that the headset is now ready for pairing.

5. Press *Menu*. Scroll to *Bluetooth,* **SELECT** and *Search for audio accessories,* **SELECT**. The phone is now scanning for Bluetooth devices. **SELECT** the headset. The phone will initiate connection with the headset.
    QUICK ACCESS (for step 5):
    Press *Menu* followed by the sequence of numbers below.

	Bluetooth	Search for audio accessories
8910	10	2

6. Enter "0000" as the passcode then press **OK**. The volume level will be displayed. The phone is now connected with the headset.
7. Press *Back* then *Exit* to exit the *Menu*.

The headset is paired and ready to use. An icon will be displayed during the standby mode indicating that the headset is linked with the phone.
Note: Once paired, the headset and the phone have simultaneous connection with each other (keypad tones can be heard on the headset every time the keypad is pressed).

c. AUTO ACCEPT MODE
The auto accept mode allows the Bluetooth function to be turned on automatically whenever the user starts sending information such as answering or making a call via the Bluetooth headset.
1. Press **Menu**. Scroll to *Bluetooth,* **SELECT**. Scroll to *View paired devices,* **SELECT**.
2. Select the headset and press **OPTIONS**. Scroll to *Request conn. authorisation,* **SELECT**. *No,* **SELECT**.
3. Continue pressing *Back* button to exit the *Menu.*
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below.

	Bluetooth	View paired devices	Select
8910	10	4	Options

d. ANSWERING/RECEIVING A CALL
When the phone is receiving a call, a ring tone will be heard on the headset as well as on the phone.
1. Press the multi-function button down once to answer the call.
2. End the call by pressing the button again.

Note: Cell phone buttons can also be used to answer a call but audio is still transferred to the headset.

e. MAKING A CALL with the headset on
*   **Normal dialing**
    1. Enter the contact number and send. As you dial, audio and the keypad tones can be heard on the headset simultaneously but not on the phone.
    2. Press the multi-function button to hang-up and terminate the call.
    Note: If the call is terminated using the cellular phone, a tone will be heard on the headset indicating that the call has been terminated.
*   **Voice dialing**
    Refer to step g for the procedure when recording for voice dialing.
    1. Press the multi-function button once to activate the voice dialing.
    2. A beep will then be heard on the headset prompting the user to say the name of the person to call.
    3. Say the name. The name will be played back to you. The phone will then place the call automatically. In case the cellular phone does not recognize the name spoken, the steps above may be repeated.
    4. Press the button again to terminate the call.
*   **Redialing**
    Press quickly the multi-function button twice to redial the last number.

f. REJECTING A CALL
Press the multi-function button twice to reject the incoming call.

g. SETTING THE VOLUME
The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls or every time a key is pressed on your cell phone.
1. Press it clockwise to increase the volume.
2. Decrease the volume by pressing it counter-clockwise.

14

As you press the button, the volume level is simultaneously displayed on the cellular phone. Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls.

Note: It is also possible to use the volume keys of the cellular phone to set the volume by pressing the multifunction button first.

h. **RECORDING FOR VOICE DIALING**
Use your phone when recording voice dialing.
1. From standby mode, press arrow up or down.
2. Find a contact name to which you want to add a voice tag. Press *Details* button. The phone number will be displayed.
3. Press *Options* button. *Add voice tag,* **SELECT.** Press *Start,* and say the name clearly. *Voice tag saved* is displayed indicating that the voice tag has been saved.
4. In case you wish to change your recorded voice, press *Names, Voice tags,* **SELECT**. Scroll to the name whom you want to change the voice tag then press **Options**. *Change,* **SELECT**. Follow the instructions.
5. Continue pressing *Back* button to exit.

Note: Noisy environment could affect voice recognition. Record voice in a quiet environment.

USING WITH NOKIA 8910i

a. **ACTIVATING THE BLUETOOTH**
You must activate your Bluetooth to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.

  Normal dialing
  1. Enter the contact number and send. As you dial, audio and the keypad tones can be heard on the headset simultaneously but not on the phone.
  2. Press the multi-function button to hang-up and terminate the call.
  Note: If the call is terminated using the cellular phone, a tone will be heard on the headset indicating that the call has been terminated.

  Voice dialing
  Refer to step g for the procedure when recording for voice dialing.
  1. Press the multi-function button once to activate the voice dialing.
  2. A beep will then be heard on the headset prompting the user to say the name of the person to call.
  3. Say the name. The name will be played back to you. The phone will then place the call automatically. In case the cellular phone does not recognize the name spoken, the steps above may be repeated.

4. Press the button again to terminate the call.
- **Redialing**
  Press quickly the multi-function button twice to redial the last number.

f.   REJECTING A CALL
Press the multi-function button twice to reject the incoming call.

g.   SETTING THE VOLUME
The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls or every time a key is pressed on your cell phone.
1. Press it clockwise to increase the volume.
2. Decrease the volume by pressing it counter-clockwise.
As you press the button, the volume level is simultaneously displayed on the cellular phone. Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls.

Note: It is also possible to use the volume keys of the cellular phone to set the volume.

h.   RECORDING FOR VOICE DIALING
Use your phone when recording voice dialing.
1. Press the *Menu* button. Select *Contacts,* **OPTIONS**. *Open,* **SELECT**.
2. Find a contact name. Press button. (The contact number is the one being displayed.)
3. Press *Options* button. Scroll to *Add Voice tag,* **SELECT.** Instructions appear. Your voice is automatically saved on the phone after being played back to you.
4. In case you wish to change your recorded voice, press *Options* button. *Voice tag,* **SELECT**. *Change,* **SELECT**. Instructions appear.
5. Continue pressing *Exit* key to exit the *Menu.*

Note: Record your voice command in a quiet place so that only your voice will be recorded on the phone.

USING WITH SIEMENS S55

a.   ACTIVATING THE BLUETOOTH
You must activate your Bluetooth to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.
1. Press the *Menu* button. Scroll to *Setup,* **SELECT**. Choose *Connectivity,* **SELECT**.
2. Scroll to *Bluetooth,* **Change**. The phone is now connecting with the Bluetooth device. An icon will appear on the upper left corner when connected. **OPTIONS** button may also be pressed. Choose *Activate BT,* then **SELECT**.
3. Continue pressing the *On/Off/End Key* to exit the *Menu*.
QUICK ACCESS:
Press *Menu* followed by the sequence of numbers below. Doing this sequence once will either activate or deactivate the Bluetooth depending on your current setting.

Setup	Connectivity	Bluetooth
9	6	4

b.   PAIRING TO THE CELLULAR PHONE
1. Bring the cellular phone at about 20 cm from the headset.
2. Detach the headset from the holster/base.
3. Turn off the headset.
4. From the OFF state, press the multi-function button for 10 seconds or until a distinctive three-tone sound will be heard and at the same time the red and blue indicator will alternately blink. This indicates that the headset is now ready for pairing.
5. Press the *Menu* button. Scroll to *Setup,* **SELECT.** Choose *Connectivity,* **SELECT**. Scroll to *Bluetooth,* **OPTIONS**. Scroll to *Search for…,* press **ACCESS** button. The phone is now searching for devices. When the search is complete, *Devices disc.* is displayed as title. If the device you are looking for is not on the list, repeat the procedure by pressing the **OPTIONS** and **REPEAT** buttons. Then press **SELECT** to add the device. The phone will initiate connection with the headset.
6. *Pls, enter BT pin for…,* **OK**. Enter "0000" as the BT pin then press **OK**. *Handsfree trusted* will be displayed afterwards indicating that the pairing is completed.
7. Continue pressing the *On/Off/End Key* to exit the *Menu.*

The headset is paired and ready to use. An icon will be displayed during the standby mode indicating that the headset is linked with the phone.

c.   ANSWERING/RECEIVING A CALL
When the phone is receiving a call, a ring tone will be heard from the phone.
1.   Press the multi-function button down once to answer the call.
2.   End the call by pressing the button again.

Note: Cell phone buttons can also be used to answer a call. To transfer the call to the headset, press the multi-function button once.

d.   MAKING A CALL with the headset on
   ✦   **Normal dialing**
      1.   Enter the contact number and send. To transfer audio on the headset, press the multi-function button once.
      2.   Press the multi-function button again to hang-up and terminate the call.

      Note: If the call is terminated using the cellular phone, no tone will be heard on the headset indicating that the call has been terminated.
   ✦   **Voice dialing**
      Refer to step f for the procedure when recording for voice dialing.
      1.   Press the multi-function button once to activate the voice dialing.
      2.   A beep will then be heard on the headset prompting the user to say the name of the person to call.
      3.   Say the name. The name will be played back to you. The phone will then place the call automatically. In case the cellular phone does not recognize the name spoken, the steps above may be repeated.
      4.   Press the button again to terminate the call.

   ✦   **Redialing**
      Pressing quickly the multi-function button twice triggers the cell phone to redial the last number. Call is automatically transferred on the headset.

e.   REJECTING THE CALL
Press the multi-function button twice to reject the incoming call.

f.   SETTING THE VOLUME
The headset has a digital volume control and is combined with the multi-function button. Setting the volume can be done during calls only.
1.   Press it clockwise to increase the volume.
2.   Decrease the volume by pressing it counter-clockwise.
Continuous pressing of the digital volume control can rapidly set the volume. If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls.

Note: It is also possible to use the volume keys of the cellular phone to set the volume. As you press it, the volume level is simultaneously displayed on the cellular phone.

g.   RECORDING FOR VOICE DIALING
Use your phone when recording for voice dialing. Record your contact names and numbers in the "Address book" (phone memory).
1.   From standby mode, open the *Address book* by pressing the arrow down key⌇ (If Phone book is the one displayed, press ⊟⊖⊟key to switch to Address book.)
2.   Select a contact name. **OPTIONS**.
3.   Scroll to *Voice dialing*, **SELECT**. *New,* **SELECT**. *Recording for: contact name*, **YES**. Follow the instructions. Your voice is automatically saved on the phone after being played back to you.
4.   In case you wish to change your recorded voice, press *Options* button. *Voice tags,* **SELECT**. *Change,* **SELECT**. Instructions appear.
5.   Press *On/Off/End key* to exit

Note: Noisy environment may affect voice recognition. Record your voice in a quiet place.
